Professional Summary

Full-stack Software Engineer with **1+ year** of production experience at a US-based AI SaaS startup. Promoted intern-to-full-time in **6 months**; shipped systems handling **10,000+ daily requests** across FastAPI, Next.js, PostgreSQL, and AWS. Strong track record of measurable delivery in fast-moving, cloud-native environments.

Work Experience

Software Engineer (Full-Time) | Pairentthesis | USA (*Remote*) Oct 2025 – Present
AI-powered SaaS product / FastAPI, PostgreSQL, Redis, Firebase, AWS ECS, Docker, Langfuse

- Architected and shipped a real-time notification system using **Firebase Cloud Messaging (FCM)**, delivering **1,000+ daily** push and in-app notifications and increasing user engagement by **25%**.
- Engineered high-performance **RESTful APIs** using FastAPI, PostgreSQL, and Redis; applied query batching, caching, and connection pooling to reduce average API latency by **30%** under growing production load.
- Built a production-grade **FastAPI** backend for AI-powered workflows with **Langfuse** observability, enabling prompt tracing, LLM response monitoring, and latency tracking across production LLM features.
- Designed and implemented end-to-end **CI/CD pipelines** using GitHub Actions, Docker, and AWS ECS, automating backend deployment workflows and reducing manual release overhead.
- Built OAuth-based integrations with **Salesforce** and **HubSpot** to securely import and sync customer data, enabling automated lead ingestion and cross-platform data consistency.

Software Engineer Intern | Pairentthesis | USA (*Remote*) May 2025 – Oct 2025
Next.js, Node.js, AWS (EC2, ECS, S3), PostgreSQL, REST APIs

- Built and iterated on core product features using **Next.js** and **Node.js**; **promoted to full-time engineer within 6 months** based on delivery ownership and execution quality.
- Owned the complete feature lifecycle from requirement scoping and API design through AWS deployment and production monitoring in a fast-moving startup environment.
- Integrated **OAuth workflows** for LinkedIn and Twitter/X, enabling secure account connectivity for automated content posting, scheduling, and cross-platform sharing.
- Built webhook integrations with **Tally**, **Typeform**, and **Zapier Forms**, automating real-time customer data ingestion and reducing manual operational overhead.

App Developer Intern | LDvia Innovations | Pune (*On-Site*) Mar 2025 – Apr 2025
React Native, Node.js, TanStack Query, AWS EC2, AWS Amplify, JWT

- Implemented complete authentication flows (Sign Up, Sign In, OTP, Password Recovery) using **TanStack Query** and **JWT**, achieving a **99% login success rate** in production.
- Deployed and managed a **Node.js** backend on AWS EC2 and React Native app on AWS Amplify; configured monitoring and auto-restart policies, reducing deployment downtime by **35%**.
- Built a reusable component library of **12+ shared UI components**, improving cross-team development efficiency by **25%** and eliminating duplicate frontend implementation effort.

Full Stack Developer Intern | DigiLifeStyle | Pune (*On-Site*) Dec 2024 – Feb 2025
Next.js, React, Node.js, Express.js, PostgreSQL, MongoDB, Tailwind CSS

- Rebuilt the company website using **Next.js SSR** and SEO optimisation, improving search visibility, page load performance, and long-term maintainability.
- Designed and maintained **REST APIs** using Node.js/Express, PostgreSQL, and MongoDB, supporting **10,000+ user records** with consistent **sub-200ms** response times.
- Developed modern, responsive UI components using **React** and **Tailwind CSS**, standardising design patterns and improving usability across the platform.

Projects

BookMyArena | bookmyarena-ten.vercel.app — Sports Venue Booking Platform

Next.js, Express 5, TypeScript, PostgreSQL, Razorpay, Firebase Admin, Docker, AWS ECS, Sentry

- Built a **multi-app monorepo** with **3 Next.js frontends** (consumer, partner, admin) backed by a modular **Express 5 API** spanning **13 domain modules**; enforced **JWT client binding** to prevent cross-app token

replay across consumer, partner, and admin gateways.

- Engineered a **dynamic pricing engine** computing real-time slot prices via configurable demand, peak-hour, and weekend multipliers, with full **PriceHistoryRecord** persistence per transaction for auditability.
- Designed an **ELO matchmaking system** using PostgreSQL atomic transactions to pair players within ± 200 **skill rating** under concurrent load; fired **Firebase FCM** push notifications to both players on match.

LifeOS | life-os-824i.vercel.app — Personal Life Management System

Next.js 15, TypeScript, PostgreSQL, Prisma ORM, Recharts, Framer Motion, Tailwind CSS

- Shipped a personal OS with **10+ modules** (tasks, goals, fitness, health, finance, investments, study, planner, notes) on a normalised **PostgreSQL** schema of **15+ relational models** via Prisma ORM.
- Built a real-time analytics dashboard aggregating health logs, portfolio P&L, fitness stats, and study hours via concurrent **server-side data fetching**; visualised with **Recharts** and **Framer Motion**.
- Implemented **JWT-based authentication** with row-level user isolation across all models; added a mutual fund/stock investment tracker with SIP scheduling and real-time P&L computation.

Open Source

- Contributed frontend bug fixes and UI improvements to **Requestly** — an open-source browser extension with **6.5k+ GitHub stars** — through pull requests and collaborative code review.

Education

D.Y. Patil College of Engineering, Pune

2022 – 2026

Bachelor of Engineering in Computer Engineering

SGPA: 8.72 / 10

Technical Skills

Languages:	JavaScript (ES6+), TypeScript, Python, C++, Java
Frontend:	React.js, Next.js, React Native, Tailwind CSS, TanStack Query
Backend:	Node.js, Express.js, FastAPI, REST APIs, WebSockets, Authentication & Authorization
Databases:	PostgreSQL, MongoDB, MySQL, Redis, Prisma ORM, Drizzle ORM
Cloud & DevOps:	AWS (EC2, ECS, S3, Amplify), Docker, GitHub Actions, CI/CD Pipelines
AI & LLMs:	OpenAI API, Gemini API, LangChain, Langfuse, RAG Pipelines, AI Guardrails, Prompt Engineering
Concepts:	System Design, API Design, Scalable Architecture, Performance Optimisation, Caching, RBAC
Tools:	Git, GitHub, Postman, Linux, Agile/Scrum
